What **happens** when data is connected to knowledge?

Apple Ile - CC BY 3.0, Bilby via Wikimedia Commons

Slow **earned** experience search-and-replaced with rapidly **authenticated** truths

Where does our reliance on "all the facts" take us?

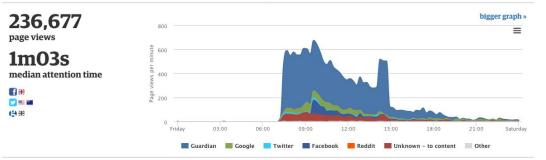

Politics

Election 2015: party leaders campaign after TV debate – as it happened

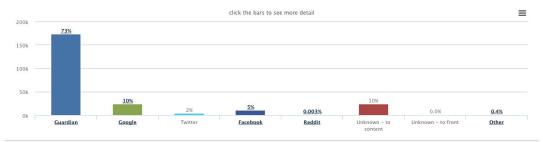

Cameron, Miliband, Sturgeon and Farage all score strongly as polls suggest no clear winner in TV showdown. Join Andrew Sparrow and the Guardian politics team for the morning after the night before

Swiss Open Data repositories

If you wish to make an announcement about new data sources, please use the forum. As a general rule, we do not host data ourselves, but can help answer your questions about usage and infrastructure. We recommend (re)publishing open data in Datahub.io and opendata.swiss. We are happy to help answer questions about open data, and relay your feedback correspondingly.

C

Other sites where you will find many datasets of national interest include:

- opendata.swiss, the official Swiss Open Government Data portal
- Datahub.io Switzerland group run by Open Knowledge
- National Statistics Portal
- Swiss Federal Geoportal (API)

The following Swiss cities and cantons have their own portals: City of Zürich, Canton of Geneva

How do IA and open data play together?

Ideators, Designers and Developers work with open data - for transparency, innovation and efficiency!

MAKE is an ongoing event series by **Opendata.ch**, the Swiss chapter of the **Open Knowledge Foundation**.

Switzerland's national Open Data Camps bring thinkers and makers together to discuss critical questions, create prototypes (such as apps and visualisations), and help accelerate openness, innovation and efficiency in private and public domains.
