

# Lessons from a UX career 10 years in the making

Anita Cheng, *civic technologist*

# About me

- Career changer
- UX Team of One to content designer
- Government experience (city, county, federal\*)

# \* Disclaimer!

---

- I am speaking in my personal capacity, and not on behalf of my current agency.
- I (still) can't talk about my work in the federal government, not even during the Q&A. (Sorry!)

**Let's get started!**

*Lesson #1:*

# Solve problems

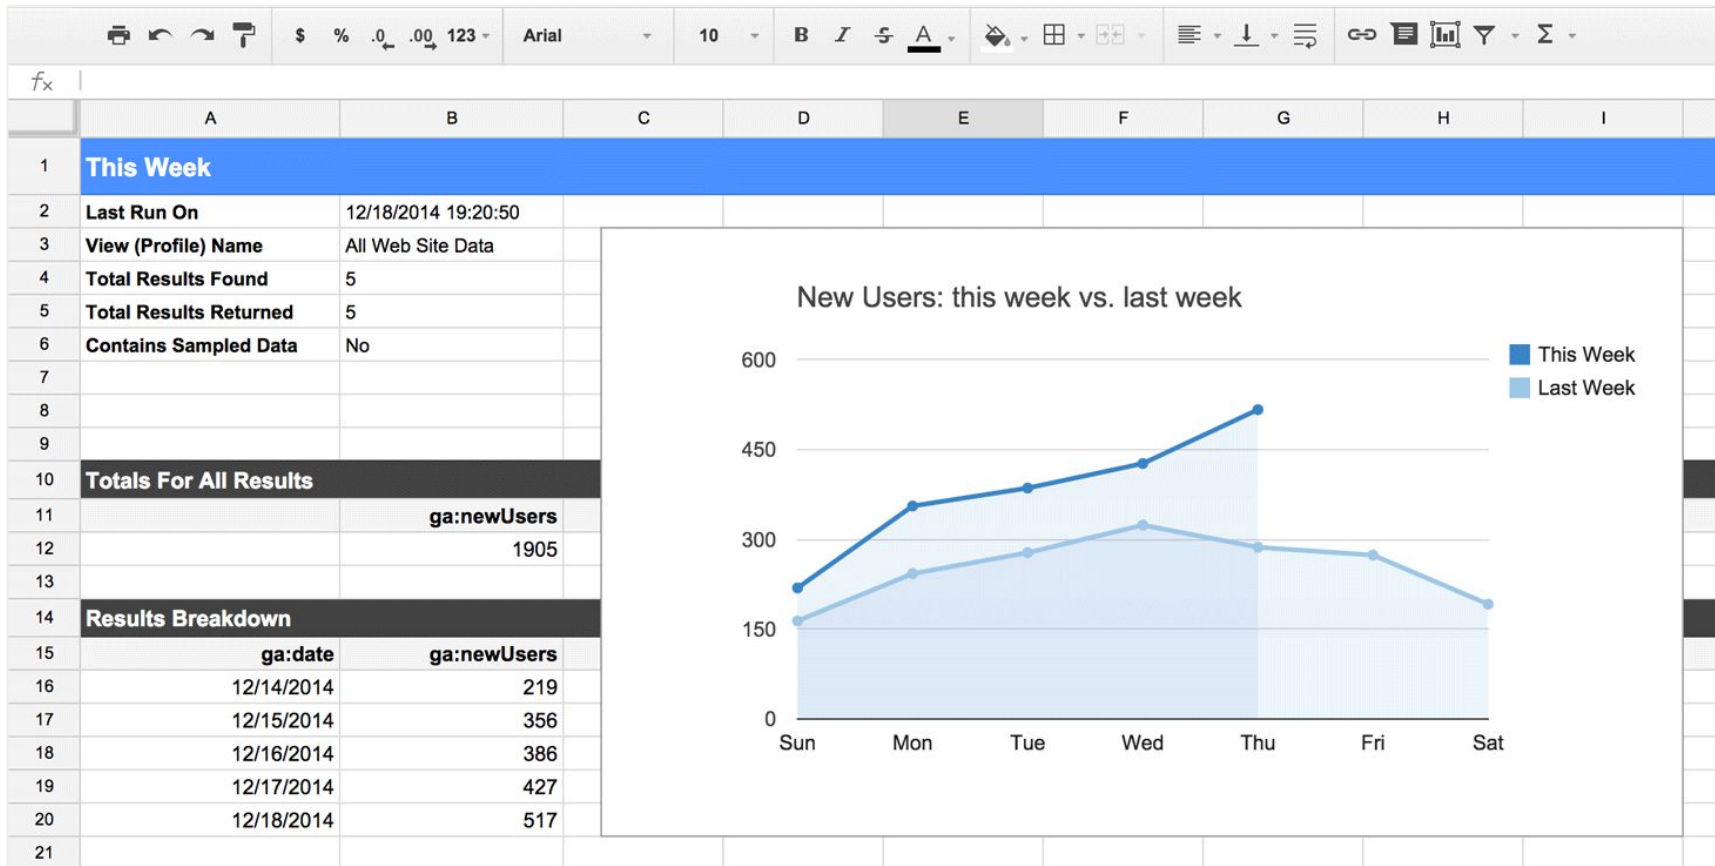

**It's not about how much you know, it's how much you can listen and help.**

**(Nobody cares about the  
design tools or frameworks  
you know!)**

**Design is about problem  
solving.**

**And it's people who  
have the problems.**

(Not real data, but generally what the spreadsheet looked like.)

**Give help to get help.**

*Lesson #2:*

# Manage expectations

**People often don't agree on  
the problem being solved.**

**It's ok if you don't achieve as  
much as you would have liked...**

**...as long as people didn't  
expect you to. 😅**

**Talk enough to be sure everyone is on the same page at all times.**

**Be extra communicative around updates  
- they often involve scope changes!**

**Knowing what you need,  
articulating it, and being able  
to predict the future are all  
signs of deep experience.**

**“We’ll look into it and get  
back to you later.”**

Good stakeholder management 👍

*Lesson #3:*

# Learn what came before

**“Never forget that someone initially designed it. It was most likely a developer, but *someone* made design decisions about it.”**

Jared Spool, Center Centre - UIE

**If there's an obvious  
solution, someone has  
probably tried it before.**

**Be curious! Find out why it didn't work, and if it might work now.**

**If it won't work now, it's ok to to table it for later.**

*Lesson #4:*

# **It's all about storytelling**

**It's not about how much design work you do.**

**It's how well you explain how you solved someone's problem.**

**Nobody cares how you  
arrive at a solution!**

**They just want their  
problem solved.**

**(Sometimes they do try!)**

# Storytelling a design

---

1. Context and background → Conflict
2. Figuring out the solution → Narrative journey
3. Presenting the solution → Conclusion (“and they lived happily ever after!”)

**If it doesn't engage people,  
it has to go.**

*Lesson #5:*

# Set yourself up for success

 Pinned

@sashax

Gov't Digital Service progression:

year 1: "Why y'all talk about procurement so much? How boring."

year 2: "Man, procurement's a pain."

yr 3: "We should really consider doing something about procurement"

yr 4: "Holy crap there's nothing more important than solving procurement!"

12:05 PM · Dec 13, 2017

(Procurement: buying goods, software, and services. Often involves contracts of varying details.)

**Make sure you can get the  
resources and help you need.**

**(This includes staff!)**

**If success is imperative,  
you will be given the means  
to succeed.**

*Lesson #6:*

# Work as a team

**“I need to finish this project.”**

~~“I need to finish this project.”~~

“We can solve this problem together.”

**Other people are not obstacles  
to getting your work done.**

**Other people are how the work  
gets done.**

## Tip Sheet for Safer Social Interactions During COVID-19 Pandemic (Including After COVID-19 Vaccination)

This Tip Sheet was developed by the San Francisco Department of Public Health and can be found at [www.sfdph.org/safer-social](http://www.sfdph.org/safer-social)

Updates from the December 16, 2020 version:

- As COVID-19 transmission decreases, our economy will progressively re-open and permitted activities will expand. Please refer to the updated **Business Capacity and Activities Table for "Gatherings"** restrictions ([www.sfdph.org/covid19](http://www.sfdph.org/covid19)).
- COVID-19 vaccines are available that are highly effective at preventing severe disease, hospitalization, and death from COVID-19. **We strongly encourage all persons to get vaccinated** (find out how at [www.sf.gov/covidvax](http://www.sf.gov/covidvax)). This updated

### ORDER OF THE HEALTH OFFICER No. C19-071

**ORDER OF THE HEALTH OFFICER OF THE CITY AND COUNTY OF SAN FRANCISCO DIRECTING ALL INDIVIDUALS IN THE COUNTY TO CONTINUE STAYING SAFER AT THEIR PLACES OF RESIDENCE TO THE EXTENT THEY CAN EXCEPT FOR IDENTIFIED NEEDS AND ACTIVITIES, AND TO FOLLOW HEALTH RISK REDUCTION MEASURES OUTSIDE THEIR RESIDENCES; URGING GOVERNMENT AGENCIES TO PROVIDE SHELTER AND SANITATION FACILITIES TO INDIVIDUALS EXPERIENCING HOMELESSNESS, REQUIRING ALL BUSINESSES AND RECREATION FACILITIES THAT ARE ALLOWED TO OPERATE TO IMPLEMENT HEALTH RISK REDUCTION MEASURES; AND DIRECTING ALL BUSINESSES, FACILITY OPERATORS, AND GOVERNMENT AGENCIES TO CONTINUE THE TEMPORARY CLOSURE OF ALL OPERATIONS THAT ARE NOT YET SAFE ENOUGH TO RESUME**

(STAY SAFER AT HOME)  
DATE OF ORDER: March 2, 2021

*This Order generally allows reopenings of businesses and activities consistent with the State's assignment of the County to the red tier (see 2), based on substantial transmission of the virus, subject to certain further San Francisco safety restrictions based on local health conditions.*

Please read this Order carefully. Violation of or failure to comply with this Order is a misdemeanor punishable by fine, imprisonment, or both. (California Health and Safety Code § 120395, et seq.; California Penal Code §§ 69, 148(a)(1); and San Francisco Administrative Code § 17.0(b).)

**Summary:** On February 25, 2020 the Mayor of the City and County of San Francisco (the "County") declared a state of emergency to prepare for coronavirus disease 2019 ("COVID-19"). On March 5, 2020 the County recorded its first reported case of COVID-19. On March 16, 2020 the County and five other Bay Area counties and the City of Berkeley, working together, were the first in the State to implement shelter-in-place orders in a collective effort to reduce the impact of the virus that causes COVID-19. Since that time, we have come to learn that the virus can be transmitted in the air through aerosols and that the risk of airborne transmission is generally higher in indoor spaces.

Services Departments

### Part of Stay 6 feet apart: Physical distancing

# Visiting businesses during the coronavirus pandemic

What to expect when you go shopping, get services, or visit public places.

Even as we reopen San Francisco, the safest choice is to [stay home](#). If you do go out to public places or shop at local businesses, you can reduce your risk for getting or spreading COVID-19.

## Think about the risk of going out

Although COVID-19 cases have gone down, coming in contact with people you don't live with is still risky. People may transmit COVID-19 while not feeling sick. Most people have yet to be vaccinated, and there are new, more contagious strains for COVID-19, here in the Bay Area.

Every time you go out, you increase your risk of getting COVID-19 and passing it on to your household. Consider how much the outing means to you.

Consider the risk to yourself and the people you live with. [Older adults and people with pre-existing health conditions](#) are most in danger if they get COVID-19.

You should avoid any activities where you'd be in crowded, unmasked situations with people who don't live with you, if:

- You are older and unvaccinated
- You have health risks and are unvaccinated

## Related

[Check if a business can be open](#)

During the pandemic, many businesses in San Francisco must close. See what businesses can operate.

[Check your health before you go out](#)

Watch for COVID-19 symptoms, especially if you work outside your home, get healthcare, or go out.

[Masks and face coverings for the coronavirus pandemic](#)

Wear something to cover your nose and mouth when you leave your home.

**If you can learn from everyone,  
and leverage their strengths,  
what you can achieve together  
will be beyond your imagination.**

**Bob Wachter** ✓

@Bob\_Wachter

argue a response like CA's or SF's would be best. Had US matched CA's death rate, 234K deaths would have been averted to date; if matched SF's, 663K averted (1/4).

## Per Capita Covid-19 Deaths, U.S., CA, & SF

	Total Deaths	Population	Deaths/100K Population	Ratio vs. U.S.
United States	975,302	329,500,000	294	
California	88,689	39,500,000	224	0.76
San Francisco	839	875,000	95	0.32

- Had U.S. matched CA's per capita death rate, there would have been 741,229 U.S. deaths, and thus 234,073 deaths averted.
- Had U.S. matched SF's per capita death rate, there would have been 312,097 U.S. deaths, and thus 663,205 deaths averted.

# Lessons while working in UX (so far!)

---

1. Problem solve.
2. Manage expectations.
3. Learn what came before.
4. Tell the story.
5. Set yourself up for success.
6. Work as a team.

**You'll learn much more as  
you go along.**

**You'll do great!**

**Thank you! Q&A time!**
